InfraRx

Far-Infrared Heat Pad

To relieve chronic pain, muscle pain, joint pain as well as stiffness associated with arthritis, spasms, strains, and sprains. Provides muscular relaxation and the temporary increase of local circulation where applied.

APPLICATIONS

- Neck
- Back
- Shoulder
- Elbow
- Hand
- Wrist
- Hip
- Thigh
- Knee
- Calf
- Foot
- Ankle

Cold Compression Therapy System

CryoRx

The CryoRx Ice Machine is an industrial-strength compressive cold therapy machine designed by orthopedic surgeons to help patients recover from musculoskeletal injury or surgery.

- A light and portable machine that allows for maximum maneuverability
- Provides active compression
- Select the precise amount of cold therapy during a timeframe that is best suited for their recovery
- Anatomically designed wraps for back, neck, shoulder, knee, elbow, hand/wrist, foot/ankle and universal

MANAMED
Recovery activated

ManaSport+ Ultrasound

The ManaSport+ is a portable and rechargeable prescriptive LIPUS device (low-intensity pulsed ultrasound) that is ideal for treating soft tissue injuries. The device generates heat within the body tissues for the treatment of muscle spasms, joint contractures, increasing local circulation, and pain relief. Comes with carrying case, charger, two coupling gel tubes, reusable transducer applicator, and a transducer mounting strap. Features include:

- Rechargeable battery with a 4-hour charge time, with 3 hours of use on full battery
- 20-minute wear time
- Wireless for easy patient use

MANAMED
Recovery activated

PlasmaFlow®

The PlasmaFlow® is an easy-to-use sequential compression system prescribed by a physician, for use in the home or clinical setting to help prevent the onset of DVT in patients by stimulating blood flow in the extremities. This device can be used to: aid in prevention of DVT; enhance blood circulation; diminish post-operative pain and swelling; reduce wound healing time; aid in the treatment and healing of stasis dermatitis, venous stasis, ulcers, arterial and diabetic leg ulcers, chronic venous insufficiency and reduction of edema in the lower limbs.

Spinal and Orthopedic Bracing

Our comprehensive bracing solutions are designed to provide support, stabilization, and protection throughout the recovery process. Whether used following surgery, injury, or for conservative treatment, orthopedic braces help promote healing, reduce pain, improve alignment, and enhance patient mobility. We offer a wide range of bracing options to meet the needs of patients across multiple orthopedic and spinal conditions.

POST-OP BRACING AVAILABLE FOR:

- Shoulder
- Neck
- Hip
- Knee
- Elbow
- Foot & Ankle

ProMed Specialties

Electrotherapy

ProMed Specialties PM-725 Combination TENS (Transcutaneous Electrical Nerve Stimulation) and EMS (Electrical Muscle Stimulation) unit with 4 leads.

- Pain Relief and Muscle Stimulation
- LCD Display with 20 EMS programs
- TENS has 9 modes with 30 programs
- Adjustable timer and cumulative (compliance) timer
- System includes: unit, 2 lead wires, rechargeable battery, 4 self-adhesive reusable electrodes, charging cable, instruction book, and case

DJO® POWERING MOTION™

Bone Growth Stimulator

CMF OL1000 Bone Growth Stimulators are portable, battery powered medical devices indicated for use in the non-invasive treatment of an established nonunion fracture acquired secondary to trauma, excluding all vertebrae and flat bones.

The device was designed with following features:

- Lightweight and comfortable
- Easy-to-use & Non-invasive
- Requires simple, one-button operation

Lumbar and Cervical Traction and Decompression

POSTURE PUMP® DISC HYDRATOR®

Fits under the back in four positions: lumbosacral, lumbar, thoracolumbar, and thoracic, to bring relief to specific problem areas.

Exclusive patented dual air cell pouch allows for independent angled joint separation. The two angled air cells vector apart to lift and stretch the lower back in a unique way, decompressing and aligning spinal joints. As the dual air cells lift and expand the spine, nutrient-rich fluid lubricates the joints, and promotes disc expansion and disc hydration.

smartrecovery

Smart-Stim™

The Smart-Stim™ is a wireless, portable **Transcutaneous Electrical Joint Stimulation Device** (TEJSD). It delivers mild, controlled electrical impulses through skin electrodes placed over affected joints. It has 15 selectable intensity levels and 6 treatment functions. The system includes a remote controller, treatment pads, USB charging cord, and accessories for at-home or in-clinic use. PDAC Approved HCPCS E0762.

WHAT IT'S RECOMMENDED FOR:

- Symptomatic relief and management of chronic, intractable joint pain.
- Pain associated with osteoarthritis.
- Pain related to inflammation in joints.

Smart-Wave™ 3-in-1 Stimulator

FDA-cleared device combining EMS/ eSTIM, TENS & Muscle Conditioning

- 3 modes: Pain relief, muscle re-education, strength support
- 20 EMS, 20 TENS (30 min), 10 Functional (15 min) programs

INDICATIONS:

- Musculoskeletal pain
- Post-op recovery
- Muscle weakness
- Rehab support

KEY BENEFITS:

- All-in-one recovery system
- Enhances circulation & healing
- Ideal for early rehab & home use
- Wireless & easy to operate

Seat Lift Assist

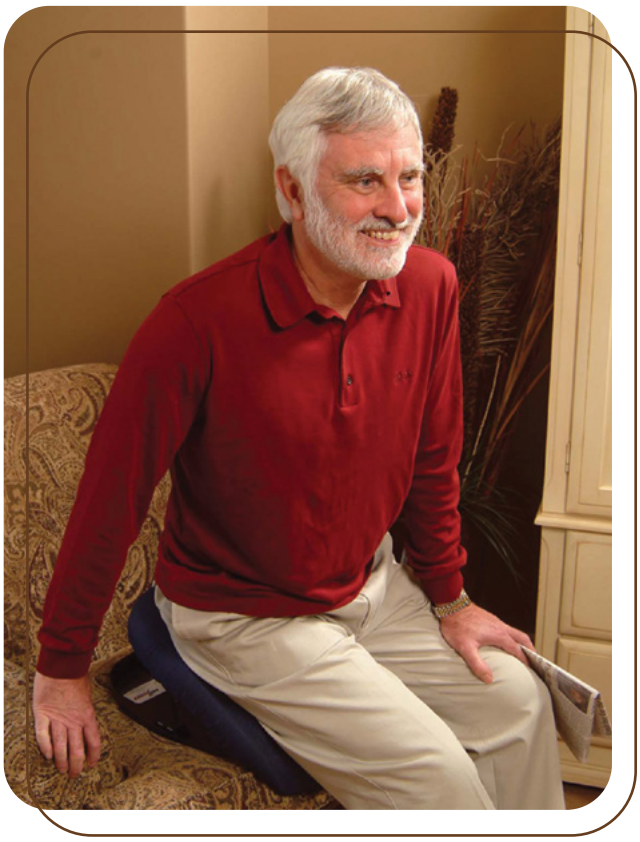

The Seat Lift Assist is a portable, self-powered lifting cushion that gently helps a patient stand up or sit down by providing up to 70% lift assistance. It does not require electricity or batteries and works on most chairs and sofas. It promotes patient independence, reduces caregiver strain, and lowers fall risk during sit-to-stand transitions.

SEAT LIFT ASSIST FEATURES:

- Portable lift cushion — no power needed
- Provides up to 70% lift support for safe, easy standing
- Works on most chairs and sofas
- Enhances patient independence at home
- Reduces caregiver strain and fall risk

RECOMMENDED FOR:

- Weakness in legs, hips, or knees
- Arthritis or chronic joint pain
- Post-surgery recovery (hip/knee replacement, fracture)
- Back injuries with limited trunk strength
- Patients at high risk of falls
- Controlled movement during partial weight bearing

70% sit-to-stand assistance — 340 lbs. lifting capacity

MANAMED
Recovery activated

ManaFlow® 51 (Uncalibrated)

The ManaFlow 51 half leg design is a below knee prescription-only device designed to provide effective pneumatic compression therapy. Utilizing a four-chamber, tubeless system, it applies targeted pressure to treat lymphedema and chronic venous insufficiency. The half leg coverage extends from the foot to the bottom of the knee, ensuring comprehensive treatment. Features:

- Rechargeable battery takes 3 hours to charge, 8-hour use on a single charge, can be used while plugged in
- Compliance meter shows use, pressure, and chamber

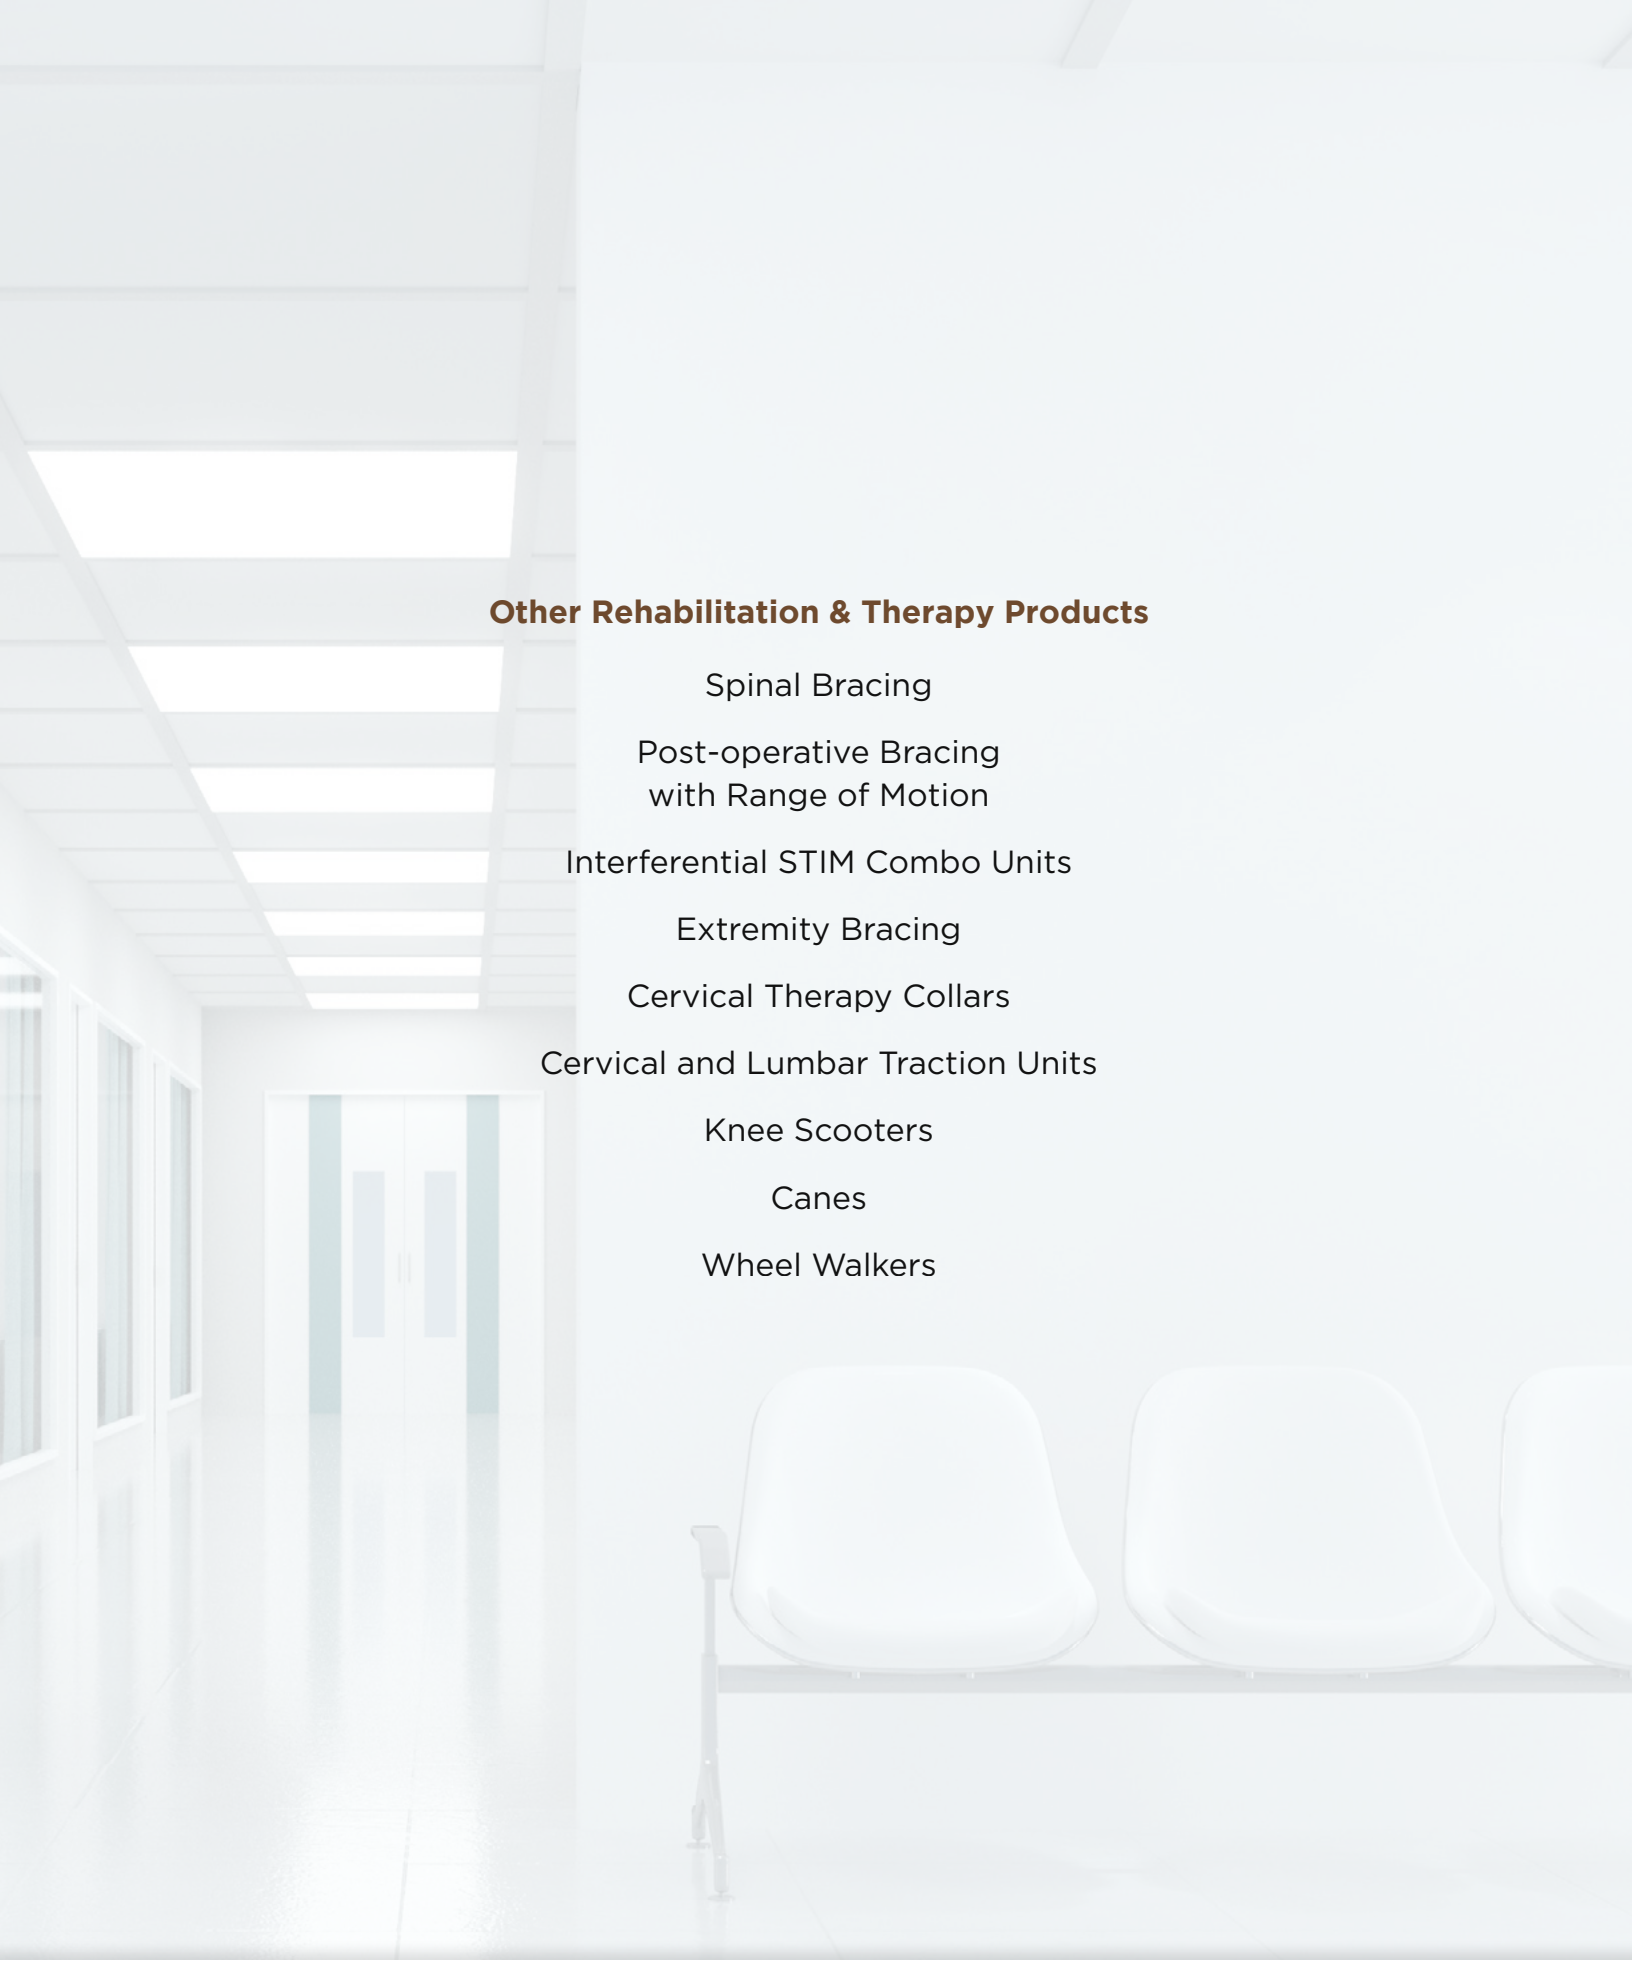

ManaFlow® 52 (Calibrated)

The ManaFlow 52 is a prescription-only device designed to provide effective pneumatic compression therapy. Utilizing a four-chamber, tubeless system, it applies targeted pressure to treat lymphedema and chronic venous insufficiency. The full leg coverage extends from the foot to below the knee, ensuring comprehensive treatment.

Features:

- Rechargeable battery takes 3 hours to charge, 8-hour use on a single charge, can be used while plugged in
- Compliance meter shows use, pressure, and chamber
- Gradient compression
- Easy-to-clean material
